Eurovent releases 2nd edition of Evaporative Cooling Guidebook at HVACR Next Generation Congress

Dubai, 22 October 2025. The upcoming HVACR Next Generation Congress in Riyadh will showcase several key industry milestones such as the launch of the dedicated product certification for high ambient temperatures and the release of the second edition of the Evaporative Cooling Guidebook by Eurovent Middle East which was first published in 2021.

The use of water in cooling processes is as old as mankind yet may provide challenges in notoriously dry environments faced in the region. This dedicated guidebook, developed with members of the association, compiles the most essential information on evaporative cooling, to provide consultants, developers, building operators and investors with a concise yet comprehensive reference to this technology. This is also the first Middle East-specific guidebook to be published by the Association.

Highlighting the importance of industry resources, Executive Director of Eurovent Middle East, Nerissa Deoraj shares, “Market education, awareness raising and thought leadership have always formed a core value of the Association. Resources such as industry recommendations and guidebooks can address some of the knowledge gaps by providing neutral, technical industry guidance, which ultimately can help support the improvement of technical competence in the industry and region. The congress provides the perfect platform to showcase the valuable technical resources published under the Eurovent repertoire.”

The industry is invited to join the 2nd Middle East Industry Congress – ‘HVACR Next Generation: Sustainability in extreme climates’ on 28 October 2025 in Riyadh which will showcase key aspects of sustainability, the refrigerant transition, indoor air quality, decarbonisation and the financial benefits related to Total Cost of Ownership as well as presentation segments featuring Sustainability Case Studies and a NextGen Technology Forum.

Participation is complimentary. Further information and delegate registration are available via the [Eurovent Middle East Industry Congress page](#).

About Eurovent Middle East

Eurovent Middle East is the region's leading industry association for Energy Efficiency, Indoor Air Quality and Cold Chain Solutions. Its participants constitute leading manufacturers of Indoor Climate (HVAC), Process Cooling, Food Cold Chain, Industrial Ventilation, and Building Automation Technologies, as well as sector associations and industry initiatives active in these fields. By thinking 'Beyond HVACR', contributing manufacturers fulfil the highest requirements in terms of product quality and sustainability.
